TONER CARTRIDGE

Fast Attractive & Strong

Molded fiber toner cartridge end caps improve packing line efficiency by eliminating assembly. Packaging line workers simply place a preformed end cap on each end of the cartridge and insert toner cartridge into the container. No folding or wrapping—no mess.

Clean white recycled paper material adds value to your product by improving its appearance.

Fibreform end caps provide superior product protection; are moisture resistant, reusable and recyclable.

Fast and Easy

Increases efficiency—no assembly

Improves Product Appearance

Adds value to your cartridges

Strong

Holds product securely without cracking or shifting

- Lightweight
- Nestable
- Non-toxic
- Proven performance

FIBREFORM

*Superior Efficiency
Superior Performance*

Molded Fibre Toner Cartridge End Caps

Fibreform produces high quality molded pulp protective packaging products. Save valuable time and energy by using our one-stop pulp molding resource.

Fibreform molded fibre end caps are the smart choice for protecting toner cartridges during shipping.

Thicker gauge material provides your product with superior protection — even when shipping overseas.

Most common sizes are in stock with custom sizes and designs provided on request.

Lightweight, nestable molded fiber minimizes handling, transportation and storage costs. Recyclable, biodegradable and completely non-toxic materials make handling and disposal safe, easy and inexpensive.

We're the one-stop pulp molding resource that gives you more efficiency, more strength and better product appearance.

That's smart packaging.

Molded fibre end caps to fit many cartridges and carton sizes including:

NX	SX
EX	VX/IPX
LX	WX

And More!

*Custom sizes and designs are also available.
Ask us for a free sample kit.*

Fibreform molded fibre end caps improve packing line performance by reducing motions. Simply place two ends on the cartridge and insert into box.
